## New York Cotton Market. NEW YORK, Jan. 30. - Messrs, Hubbard, Price &

Co.'s daily cotton letter: "The statiscal position as made up in this morning's Chronicle shows an excess in the visible supply of tost, on bales as compared with last year, the total supply of as made up in this mornings, Chronicle shows an excess in the visible supply of tost, 270 bales as compared with last year, the total supply of American cotton now being 1,212.70 bales larger than last year, while the other growths are 141.100 bales, less. The plantation movement for the week is 100.023 bales, against 185.024 bales last year. The total of the crop in sight up to last evening is 7,114.475 bales, against 6,770,501 bales at the same time last year. There has come into sight during the past week 102.00 bales less than during the corresponding week of 1851. The weakness of the market to-day seems to have transferred itself from New York to Liverpool. Futures in the latter market are 4-64 lower. This was more of a decline than had been expected and it was therefore a source of some satisfaction and pleasure to the bulls that our market opened very steady at a decline of about 2648 points. During the day this was slightly increased, but the close is steady at within 465 points of last evening, and the presence of good buying orders during the entire session has been plainly apparent. A large proportion of such orders are supposed to have been for Wall street account. The hammering of the summer months has continued, with the result of further narrowing the differences, but the sellers of July and August have been conspicuous buyers of March contracts, with the view, it is thought, of establishing the basis of a buil movement later upon the substantial foundation of a large holding of actual cotton. Receipts for to-day promise to exceed 30,000 bales, against 18,000 last week and 34,000 last year. This is much larger than had been expected, the total being surprisingly awelled by unexpected arrivals at New Orleans. Current estimates for the weekly movement, in view of to-day's large deliveries, are now 130,000 to 135,000. We quote as follows from a circular to-day raceived from Raleigh. N. C. #We now believe in a maximum coo of 8,000,000 if all is marketed, but in the event of a depression in prices all

crop established around 8,000,000 bales. We are especially impressed with the dullness of trade generally. As compared with last year the falling off in the fertilizer and mule trade is unprecedented.

Futures steady; receipts at the ports for the day are estimated at 28,000 bales; 24,000 last year. The visible supply in this country is now as follows: At the ports, 1,290,000 bales; interior towns, 519,000, against 907,000 and 412,000 respectively last year, an excess of 420,000 bales. The total movement of the crop since the 1st of September is 7,114,000 bales against 6,770,000 a year ago, an increase of 344,000 bales. The excess in the movement has decreased 176,000 bales in the past two weeks. The stock in New York warehouses is 264,000 bales, against 94,000 bales; midling uplands, 756; sales, 130 bales. Transactions in futures to day, 85,000 bales. February, 7,1247,131; March, 7,187,191; April, 7,2667,27; May, 7,35647,37; June, 7,4567,46; July, 7,2567,55; August, 7,5167,62; September, 7,7167,772; October, 7,80.

The Courier-Journal of Friday morning, January: S. 1822, reports the Louizville (Ky.) tobacco market as follows:

The market exhibited no particular change to-day. Offerings were again very heavy and the round of the warehouses could not be completed. The attendance of farmers was very large and the attendance upon the breaks was so great that now and then the buyers could not get at the sample. On that account some hogsheads were neglected.

Offerings were very good in quality and were generally in tipe order. Many fine hogsheads

medium types were doing well. Old burleys were selling at satisfactory prices. Darks, as usual, were but few in number, scarcely enough, and sold at 3 to 55d., very few selling under Receipts to-day were fairly large, but expect-

lecline in a day or two.

# ELECTROPOISE, Electropoise.

We hear of the splendid results produced by the ELECTROPOISE. What is being done in England now has been going on in America for

several years. 28 Hampton Place. BRIGHTON. MR. JOHN N. WERR, (4 North Street Quadrant):

Dear Sir.—In August last a little book fell into my hands, entitled "How to Cure Disease without Medicine." This seemed quite impossible to me. and I simply laughed at the idea. However, on investigation I gave up that feeling and became possesor of one of your patent Electropoises. After using it eight times to my surprise found the Varicose Veins in my leg much reduced, and the pain entirely gone. I felt no shock or inconvenience whatever. My wife has also used it for Indigestion with the same good results, and is now able to walk distances that have been impossible heretofore. I am, yours faithfully.
